

# WASHINGTON STATE DEPARTMENT OF ECOLOGY HAZARDOUS WASTE DIRECTORY GOES "ON-LINE"

The Hazardous Waste Services Directory (Ecology publication # 98-412) is now available on the Internet. The Directory is intended to help hazardous waste generators identify and contact businesses that can help them manage their hazardous wastes. The Directory also lists companies that sell waste management products.<sup>1</sup>

- ➔ To get started, go to: <http://www.ecy.wa.gov/apps/hwtr/hwsd/default.htm>.
- ➔ The first screen lists the services available to hazardous waste generators. Select which type of waste management service is needed, and click on the "Search" button. This generates a listing of all the companies that offer this service.
- ➔ Select a firm and click on "Details" to get more information.

The directory is updated routinely to keep the information current and useful.

If you have any questions or comments about the on-line Hazardous Waste Services Directory, e-mail Dave Zink, at [dzin461@ecy.wa.gov](mailto:dzin461@ecy.wa.gov) or call (360) 407-6752.

*If you have special accommodation needs or need this document in an alternative format, contact the Hazardous Waste and Toxics Reduction Program at (360) 407-6700 (voice), dial 711, or call (800) 833-6388 (TTY)*

**<sup>1</sup>DISCLAIMER: The Department of Ecology does not assume any liability for the accuracy or completeness of the information presented in the Hazardous Waste Services Directory. A listing of a firm does not constitute a recommendation. Proper handling and disposal of waste is the responsibility of the generator.**
